

USER REPORT

The **FinCoop Cooperative Financial Transaction Management System** is a Python-based application that helps a cooperative society manage members, financial transactions, and loans. The system allows users to register members, make deposits and withdrawals, process loans, search transactions, undo recent transactions, and generate reports.

System Requirements

Hardware Requirements

- Computer or laptop
- 4 GB RAM or more
- Keyboard and monitor

Software Requirements

- Windows 10 or Windows 11
- Python 3.10 or later
- Visual Studio Code (or any Python IDE)

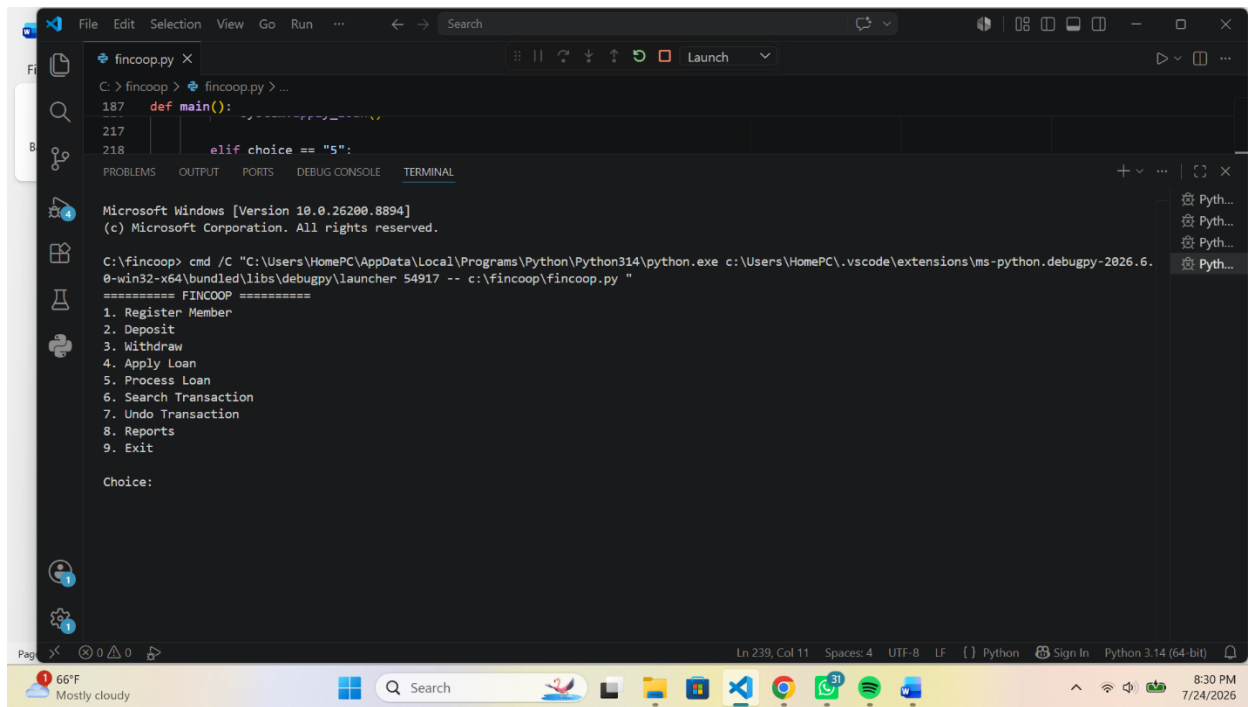

Starting the System

1. Open the project folder in Visual Studio Code.
2. Open the Terminal.
3. Run the program using:

`python fincoop.py`

4. The main menu will appear.

Main Menu
